

Digital Infrastructure for the Circular Economy

Committed to sustainable development goals:

Core team with deep Digital and Circularity expertise.

Christian Adler

- Former BCG Asc. Director for Digital Transformation & AI
- Studied Computer Science, Tech. Mgmt. and Circular Economy

Alexis Gamboa

- Former Digital Twin developer at EY (Costa Rica & USA)
- Studied Data Analytics and Technology Management

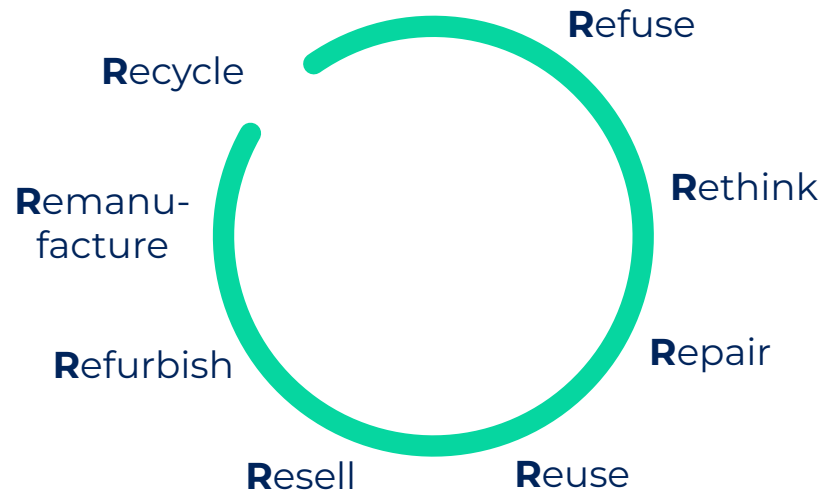

The linear economy is coming to an end.

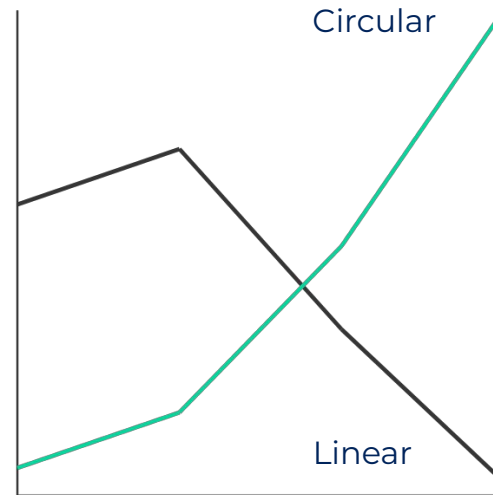

Circularity becomes a must for all companies.

Implement R-strategies

Reach emission targets

Scale circular business models

Stay competitive

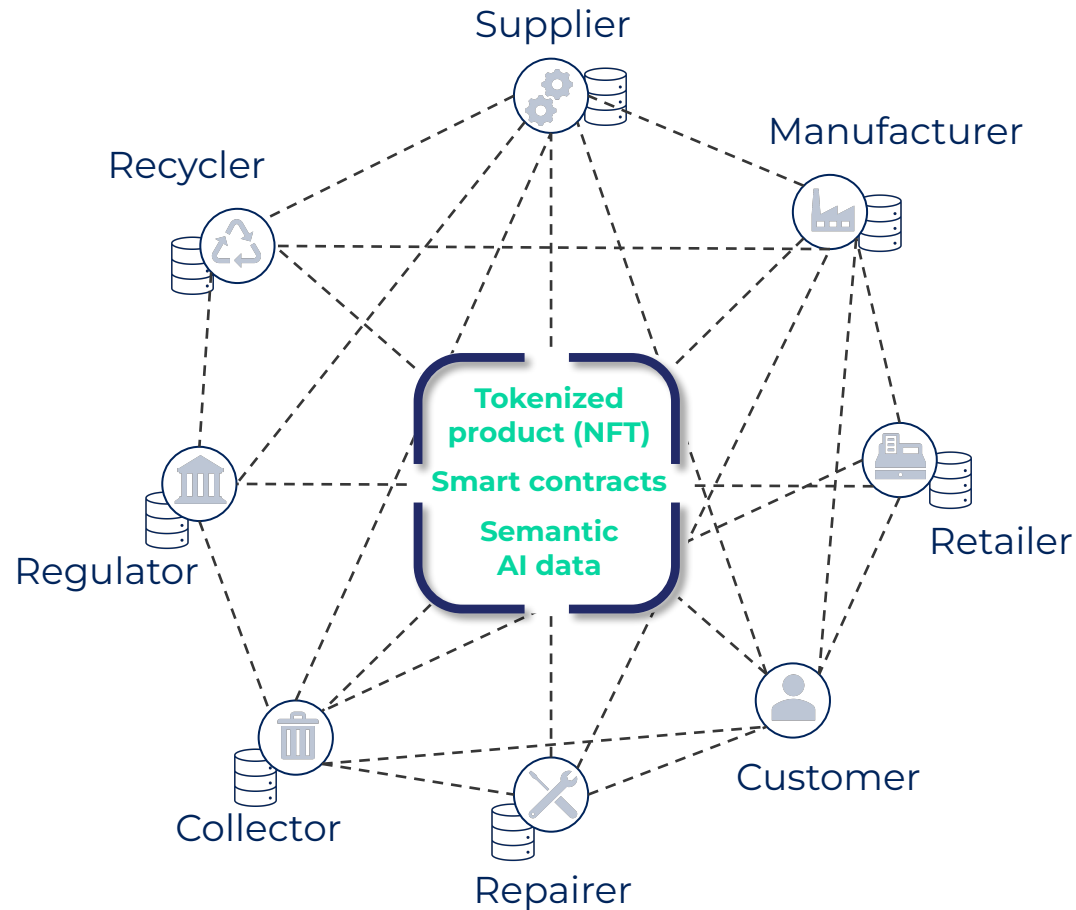

Fulfill regulation

Become compliant

Circularity = Collaboration. We connect all actors around the loop.

From siloed to distributed product data

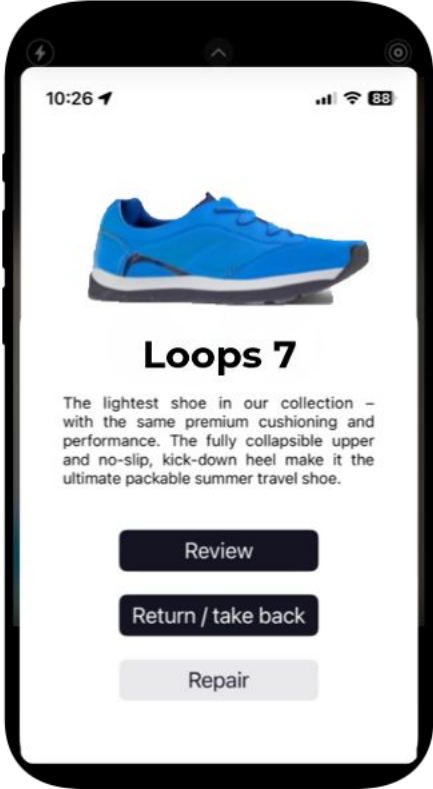

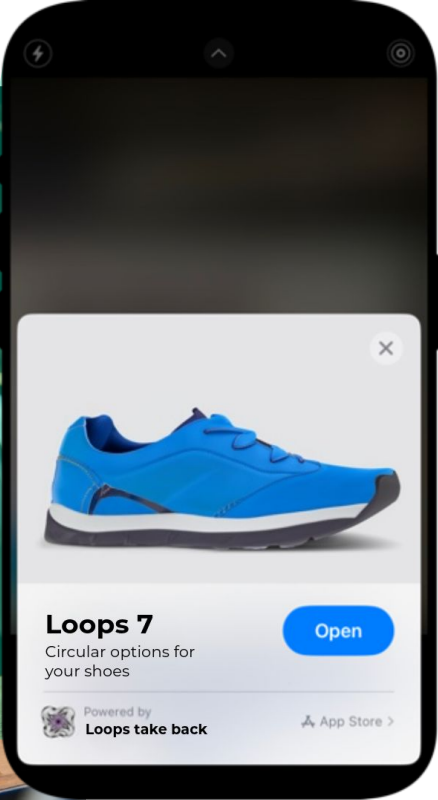

Secure links and data access

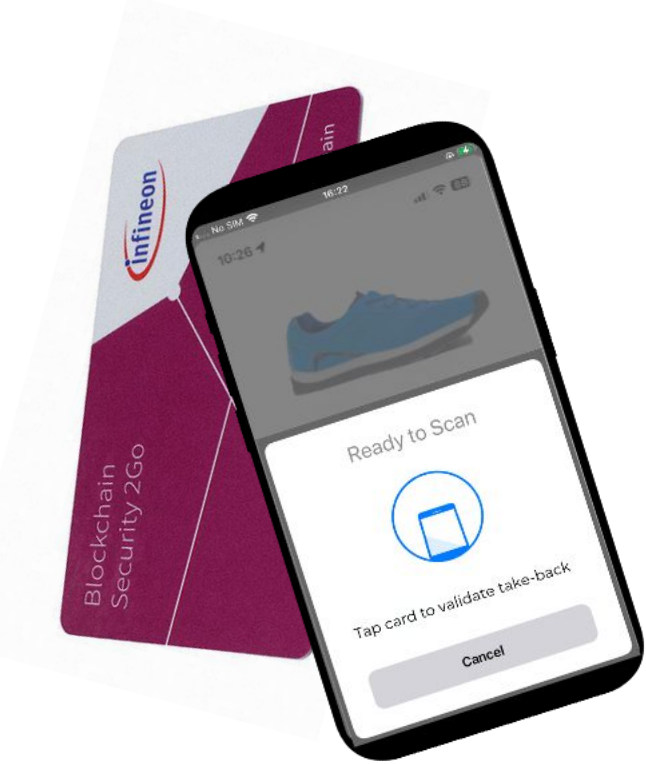

- ✓ machine-readable product lifecycle data
- ✓ secure, auditable transactions
- ✓ decentralized interoperability

Our digital infrastructure enables new processes, e.g. for take-back.
